

Energy Savings & Reduced Greenhouse Gas Emissions in Morgantown

Morgantown Public Library
Meeting Room A downstairs
373 Spruce Street, Morgantown, WV 26501

Thursday, November 14, 6:00–7:30 pm

A Community Conversation about Energy Use and Greenhouse Gas Emissions in Morgantown!

- Have you ever wondered how much energy Morgantown uses and how that translates into greenhouse gas emissions?
- Would you like to learn how you could save energy in your home or business?
- Do you have ideas for our decision makers on how our community can save energy and create a more sustainable Morgantown?

If you answered yes to any of these questions, please join a conversation about energy use and greenhouse gas emissions in Morgantown on Thursday, November 14. The event is third in a fall series of “Green Nights at the Library,” organized monthly by the Morgantown Municipal Green Team. The meeting starts at 6:00pm at the Morgantown Public Library at 373 Spruce Street. Parking is available across the street.

Jeff Simcoe, Ben Gilmer, and Andrea Varrato of the local consulting firm Downstream Strategies will introduce the community to an Appalachian Stewardship Foundation-sponsored project whose overall goal is to identify and implement energy-saving opportunities in Morgantown.

***The Morgantown Municipal Green Team** is a group of citizens that advises the City of Morgantown on matters relating to sustainability in public policy, planning, education, departmental management, development, and evaluation of environmental and energy-related issues.
